POLISH TECHNICAL REVIEW

POLISH TECHNICAL REVIEW

POLISH TECHNICAL REVIEW Bimonthly

PUBLISHERS OF TECHNICAL PERIODICAL FOR THE CENTRAL TECHNICAL ORGANIZATION
00-950 Warszawa, Czackiego 3/5, POB 1004, tel. 33 99 12

Editorial	3
Economic survey	4, 36, 46
ELECTROTECHNICS	
Licences and know-how in the trade policy of ELEKTRIM	6
EMA-CELMA at a new stage of development	9
New series of single-phase induction capacitor motors	12
Fractional horsepower motors for driving precision equipment	14
Thyristor converters for uninterrupted a.c. power supply	16
Type PREa 12 II hand tapper	18
Universal transformer substations PTKE	19
Machines for storage battery and cell industry — Polish speciality in CMEA countries	21
WIS-400M short-circuit braker	26
Electronic equipment for traffic-light control	27
AUTOMOTIVE INDUSTRY	
From licence to world records	28
Motor vehicle service and repair equipment	29
The transportation of prefabricated elements in house construction in Poland	33
APPLIED SCIENCES	
New developments from the establishment of the Polish Academy of Sciences	37
Precision Machine Tool Factory AVIA — a plant with long tradition	38
MISCELLANEOUS	
Welding manipulators	41
The ZT3-22 friction welder	42
Milking machines to Swedish ALFA-LAVAL licence	43
N.O.T. prizes — 1973	44
NEW BOOKS	44
NEWS IN BRIEF	

Editorial Board:

Z. Cibor, J. Czarnarski, B. Dowejko, L. Drecki, J. Dziubiński, S. Gawlik, A. Górecki, S. Gruzewski (Chairman), M. Grzymek, B. Jankowski, A. Jung, T. Książek, F. Kubiczek, C. Myczkowski, M. Paluch, B. Perkowski, T. Topolnicki
 Editorial staff: T. Topolnicki (Editor), J. L. Toeplitz (Assistant Editor), S. Hilscher, Z. Schellenberg
 Art Editor: F. Barącz
 Responsible for advertisement: T. Pachnowski
 English Editor: S. Zalewski
 Collaborators: P. Dytko, J. Hummel, W. Iwiński, J. Łuczaj, H. Stepień

ZWOLIŃSKI A.: Licences and know-how in the trade policy of ELEKTRIM
 Polish Technical Review 1974, No. 1
 The open policy in ELEKTRIM's foreign trade has increased interest in the purchase of licences and know-how. Is it a short- or long-term policy? Using the example of several licences purchased by PTHZ ELEKTRIM, the author reviews the problem of purchase and further development of licences with the view of continuous improvement and modernity of products.

TOPOLNICKI T.: EMA-CELMA at a new stage of development
 Polish Technical Review 1974, No. 1
 New products from the EMA-CELMA Electric Machinery Works, Cieszyn, — a multi-plant firm since October 1973 — are presented. The firm makes mainly induction motors of intermediate power, e.g. specialized motors for use in mining, metallurgy, chemical industry, shipbuilding, and sugar industry; and electrodes. The firm has modern technical facilities and a well organized toolmaker's shop.

SKOWROŃSKI J.: Thyristor converters for uninterrupted a.c. current supply
 Polish Technical Review 1974, No.1
 Electricity users who have equipment that must keep working without any interruptions use thyristor converters in order to ensure current supply in case of a power failure. Polish makers produce single- and three-phase thyristor converters incorporating control and stabilizing circuits and phase voltage shifting.

KWASNIK J., CHYŻY W.: Machines for storage battery and cell industry — Polish speciality in CMEA countries
 Polish Technical Review 1974, No.1
 Chemical current sources are increasingly in use. In Poland there is planned a further development in this field. There is described equipment for the production of lead-acid starter and traction accumulators, and for the production of alkaline accumulators and dry cells.
