NEW YEAR 1976

Polish Technical Review

New fishing vessels

Being one of the largest manufacturers of fishing vessels Poland initiates ever new designs of both short and long-range catchers as well as auxiliary fishing units like factory ships, refrigerated vessels, etc. The article gives a description of new small-tonnage stern trawlers and industrialised trawlers, and presents new types of equipment guaranteeing good results in fishery.

CONTENTS

New fishing vessels	2
75 000 m ³ liquid petroleum gas carriers	5
Yachts from Szczecin	6
Ship equipment	8
Anti-condensing chlorinated-rubber paint	11
Anti-rolling device for hydrofoil craft	11
The Northern Port in Gdańsk	12
Agricultural jet aircraft	16
City-bus Jelcz-Berliet PR-110 U	17
STAR-200 lorry	18
TDP sliding road pavements in strip mining	19
360 MW steam turbine	20
Economic Survey	21, 22
In brief	4, 15, 24
Index of PTR for 1975	24
Index to advertisements in 1975	26

The Northern Port in Gdańsk

The rapid growth of Polish foreign trade turnovers was the main reason of building a new port for the transshipment of bulk cargo in Gdańsk. The article discusses the location of the port, three of its reloading bases for coal, oil and oil products and ores, characterizes the scope of this investment project and the new technical solutions applied in the construction of the port.

Agricultural jet aircraft

Poland's extensive programme of crop spraying services provided to many countries of the world is based on a domestic production of agricultural aircraft. The newest design of such aircraft (M15) has been developed jointly with the U.S.S.R. The M15 is an all-metal, two-boom sesquiplane with a short fuselage and a turbo-jet engine. The tanks for chemical stuff have been mounted in a special structure between the airfoils. The aircraft can operate from air fields and features a very high output capacity.
