Means of transport for building industry	12
Cranes	14
Equipment for finishing work	15
Damper 16 t	17
Testing of building machines	18
The Warsaw Research Estate	19
6200 GRT passenger/car ferry	20
ECONOMIC SURVEY	22
IN BRIEF	4, 10, 13, 16, 21, 23

Machines for the building industry

Building machines are manufactured in Poland by factories affiliated with two large Unions: BUMAR and ZREMB. The current issue of the Polish Technical Review deals mostly with the activities of ZREMB. These activities are discussed by the manager-in-chief of ZREMB Mr. Jerzy Malecki in his interview for PTR. The various articles of the current issue deal with machinery for foundation works including powered undercarriages, vehicles for the transport of powdered materials, concrete and prefabricated elements. Also discussed are machines and equipment for the production of concrete, two different types of cranes, equipment for finishing works and methods of testing building machinery in Poland.

6200 GRT passenger/car ferry

At a time when there is a growing tendency to transport commodities by the "roll-on/roll-off" system, it has become imperative to modernize the existing ferry transport stock. With a view to meet the current requirements for modern ferries, the Polish shipbuilding industry has started to build in Szczecin a series of large passenger/car ferries to orders placed by Polish and Soviet ship-owners.

The Warsaw Research Estate

The article deals with the Warsaw research estate of the future. The project of this estate is the result of a competition in which architects from Poland and other socialist countries participated.

Editorial Board: B. Dowejko, K. Drecki, S. Grużewski (Chairman), S. Katarzyński, J. Kosterka, F. Kubiczek, Z. Makomski, J. Niegowski, S. Wierwka, A. Hanftwurcel
Editorial staff: A. Hanftwurcel (editor-in-chief), J.L. Toeplitz (Assistant editor), S. Hilscher, E. Karska, Z. Schellenberg, A. Witkowski
English version: E. Karska, S. Zalewski, H. Stępień

Technical editor: A. Dziwulska-Kijas
