## CONTENTS

### MOTERING INDUSTRY

Polish motorcars on foreign markets . . . . .	2
POLONEZ . . . . .	4
The youngest Polish factory of motorcars – the Small Car Factory in Bielsko-Biala . . . . .	6
Motorcars travelling in cases . . . . .	8
Shock absorbers from Krosno . . . . .	10
Pneumatic braking systems . . . . .	12
Halogen road lights . . . . .	13
BUDOMASZ motorcar service stations . . . . .	14
The SD-80 car tester . . . . .	15
Exhaust-gas analyser . . . . .	15
Galvanising and painting equipment from Wieluń . . . . .	16

### FOUNDRY PRACTICE

Modernization of foundries abroad . . . . .	19
---	----

### BUILDING MACHINERY

The 744 CS tower building crane . . . . .	21
---	----

### PATENTS

Fatigue testing chuck – Magnet of a recording flow detector – Liquid gas proportioner . . . . .	23
--	----

IN BRIEF . . . . .	3, 18, 22
--------------------	-----------

### NEW BOOKS

ECONOMIC SURVEY . . . . .	7, 11, 22
---------------------------	-----------

### In our next issue:

- Polish railway rolling stock and equipment
- Polish ferryboat on the Poland-Denmark, Britain route

### Motoring industry

The production of motorcars in one of the most dynamically developing industries in Poland. Several articles in the present issue discuss the achievements in the field of the construction and export of motorcars and subassemblies. The authors underline the achievements of Polish know-how in the field of a further development of motorcar construction under licence. A good example of such achievements is the medium sized motorcar POLONEZ and shock absorbers from Krosno. Page 2

### Equipment for the motoring industry

The steady increase of the number of motorcars is linked with a growing demand for services – technical check-ups, repairs, etc. The Polish industry has substantial achievements also in this field. Special mention is due to standard service stations built in various sizes and for various types of services (Page 14). This section also presents a motorcar tester (Page 15) and an exhaust-gas analyser (Page 15).

### Galvanising and painting equipment from Wieluń

Galvanising and painting equipment find application in many branches of industry: construction of motorcars, production of household articles, metal industry production, etc. Poland has one of the largest factories in Europe, producing this type of equipment on the basis of Polish concepts and foreign licences and know-how. This equipment is discussed on page 16 with special consideration of galvanising automatic installations, equipment for electrophoretic painting, spray phosphatising, tunnel dryers, washers and waste neutralisation plants.

Programmatic Council: B. Dowejko, L. Drecki, S. Gruzewski (President), Z. Kotarski, Z. Makomaski, L. Olejarz, E. Szworc, K. Warchol, S. Werewka  
Editorial staff: A. Hanftwurcel (editor-in-chief), J. L. Toeplitz (assistant editor), S. Hilscher (managing editor), I. Chmielewska, J. Wolf, E. Karska, Z. Schellenberg, A. Witkowski  
English version: E. Karska  
Graphic layout: F. Barqcz  
Production manager: A. Dziewulska-Kijas  
Advertising section: T. Pachnowski
