# POLISH TECHNICAL REVIEW

PUBLISHERS OF TECHNICAL PERIODICALS FOR THE CENTRAL TECHNICAL ORGANIZATION (NOT)  
00-950 Warsaw, ul. Czackiego 3/5, P.O.B. 1004. Tel.: 39 11 99. Issued in English, French, German and Russian

## CONTENTS

The Polish railway rolling stock industry . . .	2
Electric trains for Yugoslavia . . . . .	3
The UNIKON containers . . . . .	5
32-axle flat wagon for the transport of large-sized elements . . . . .	6
DUMPCAR type freight cars . . . . .	8
Heating equipment for a rail vehicle (patent)	9
Polish railway stock in the world . . . . .	10
Railway rolling stock for the transportation of powdered building materials . . . . .	15
Voltage regulator for generators used in the railway car supply systems . . . . .	17
Molybdenum recovery from etching solutions .	19
m/f POMERANIA ferryboat on the Poland-Denmark-Britain route . . . . .	17, 18, 23
Economic survey . . . . .	20

### In our next issue:

Metal treatment — fishing bases and fleet — motorcar industry — mining machinery — electronics — measuring-control equipment

### Railway rolling stock

The present issue is devoted mostly to the railway rolling stock the production of which in Poland has a tradition of more than a century. At present 14 factories are engaged in the building of rail vehicles. The importance of the railway rolling stock industry is evidenced by the scope of production and export discussed in the articles of R. Szymański p. 2 and T. Skowrońska p. 10. Detailed solutions in the line of railway rolling stock are discussed in the articles on electric trains, DUMPCAR freight cars, a 32-axle flat wagon, railway rolling stock for the transportation of powdered building materials. The same section carries an article on containers. Page 5.

### Molybdenum recovery from etching solutions

The incandescent lamp production technology involves releasing tungsten-made coils from molybdenum cores by dissolving the latter in the etching mixture. The wastes produced during this process constituted a problem which only recently has been satisfactorily solved by means of the method of molybdenum recovery developed by experts in the Poznań Technical University. The article on p. 19 discusses the technical and economic aspects of this method.

### POMERANIA ferryboat on the Poland-Denmark-Britain route

Britain and Poland have been connected by a ferryboat line! This is the result of the growing trade and tourist traffic between the two countries (and Denmark situated at mid-distance) and of the comprehensive offer of the Polish shipbuilding industry which supplies all ships needed within a short time, at a low price and of a high quality standard. The article on p. 24 brings information about the newest Polish passenger-car ferry m/f POMERANIA and its first voyage to Felixstowe via Copenhagen.

Programmatic Council: B. Doweyko, L. Drecki, S. Grużewski (President), Z. Kotarski, Z. Makomski, L. Olejarz, E. Szwarc, K. Warchol, S. Werewka, A. Hanftwurcel

Editorial staff: A. Hanftwurcel (editor-in-chief), J.L. Toeplitz (assistant editor), S. Hilscher (managing editor), I. Chmielewska, J. Wolf, E. Karska, English version: E. Karska
