CONTENTS

Fishing vessels of the OCEANTER fishery management system	2
Potentiometric control of oxidising or reducing agents batching into chemical processing solution	6
New chemical processes	7
Tank reactor	8
High purity ferrous sulphate from pickling baths	9
Polarographic determination of cadmium in aluminium alloys	9
Recovery of copper from post-flotation wastes	9
Recovery of water and chromium compounds	9
Obtaining of silver powder	9
Level indicator	10
Car tachographs	10
Step-by-step controller	11
Mining radiometer	11
Isotopic ash content meter	12
A capacitive densimeter	12
Coble finder	13
An integrated pneumatic-electric control system	15
IN BRIEF	13, 14, 16, 17, 19
ECONOMIC SURVEY	17, 18
NEW BOOKS	19

In our next issue:

- Cold store industry
- Mining
- Computers

Chemical industry

The growing role of the chemical industry in Poland is connected, among other things, with the development of new chemical processes. An article on p. 7 of this issue presents a number of such processes which, in addition to the chemical industry, can find application in electroplating and paint shops, in the steel-making and non-ferrous metals industry.

Fishery

The new situation which has developed in world fisheries makes it imperative for the countries situated at a distance from fishing grounds to work out new concepts of catching, storage and transport of fish. One of such concepts called OCEANTER is discussed on p. 2. The suggested system is based on two unconventional mother-ships - semi-submerged trimarans and a fleet of 12 fishing vessels - trawlers. The article underlines the construction and operational qualities of the various ships and of the whole system.

POSTEOR - progress, technology, organization

The activity of the POSTEOR Enterprise for Implementing and Promoting Technical and Organisational Progress responsible for the development and popularisation of new solutions in the field of construction, technology and organisation, has brought profits of the order of many million zlotys to the Polish economy. The enterprise offers to foreign companies a number of solutions in the form of know-how. Some of them are discussed on p. 16.
