Lubrication of pile-wires in looms for the manufacture

of fibrous cover-fabrics (patent) ..... 11

### SHIPBUILDING

Polish ro-ro ships ..... 12

The H 2500 tug power plant remote control system .. 14

Economic survey - shipbuilding ..... 16

### MEDICAL EQUIPMENT

Rehabilitation equipment and electronic medical

apparatus ..... 18

Centrifuge for separating liquid mixtures especially

blood (patent) ..... 21

### RAILWAY INDUSTRY

Passenger wagons ..... 22

Wagon trucks ..... 23

### BUILDING INDUSTRY

Filtering plates for water system filters ..... 24

Anticorrosion protection of reinforcing steel with

an asphalt coating in autoclave-treated cellular

concrete ..... 25

Sintering of building aggregates (patent) ..... 26

IN BRIEF ..... 9, 21

ECONOMIC SURVEY ..... 5, 11

NEW BOOKS ..... 7

*We wish to inform all our readers that for reasons beyond the control of the editors of POLISH TECHNICAL REVIEW, the present, 10th issue is the last to be published this year. Beginning January 1981, our Review will be issued as a fortnightly edition with an increased number of pages.*

EDITORS

### Ro-ro ships

Polish shipyards belong to the few yards building general cargo carriers with a horizontal reloading system. The article on p. 12 presents three types of ro-ro ships: "Skulptor Kononkov", "Hoegh Banniere" and "Autoestrada" built for shipowners in the USSR, Norway and Brazil, respectively. The article includes also information on other designs of ro-ro vessels developed by Polish shipyards.

### Rehabilitation equipment and electronic medical apparatus

This is a section frequently discussed in Polish Technical Review which is due to the rapid development of new designs of apparatus and equipment and the starting of their production by the specialized Polish industry. In the current issue we are presenting: underpressure stretchers, underpressure trunk stabilizer, verticalizational wheel chair, dressing set for use after jaw and face injuries, spirometer for mass-scale examination, respiratory system flexibility and resistance computer, micro-computer system for intensive pre-and-post-natal care and apparatus for evaluation of intracranial reserve.
