SIGMA

PUBLISHERS OF TECHNICAL PERIODICALS AND BOOKS SIGMA - AN ENTERPRISE OF THE CENTRAL TECHNICAL ORGANIZATION
ul. Biala 4, 00-950 Warsaw, P.O.B. 1004, tel. 39 11 99. Issued in English, French, German and Russian

CONTENTS

INDUSTRIAL FURNACES

Soaking furnaces	2
Equipment for the heat treatment of metals	7

PATENTS

A two colour liquid crystal indicator	10
Valve with automatic valve stem lubrication	10
Oscillatory drive mechanism	11
A mirror angular displacement mechanism	11

MACHINE BUILDING

A mechanical screwing machine	11
A new generation of medium-speed motors	12
An automatic drive switching system for equipment with a large moment of inertia	14

ELECTRONICS

Method for increasing the reliability of electronic components	15
A chamber with a laminar air flow	17
A system for industrial measurements of quartz crystal units	18
Logic elements for didactic purposes	20

CHEMISTRY

Manufacture of formaldehyde in the presence of a modified silver catalyst	21
The WO-300 oil absorber	22
Purification of waste gases contaminated with combustible compounds	23

EXPORT OF SMALL PLANTS

Small export products manufacturing plants	24
--	----

AT A DESIGNERS DRAWING BOARD

Furnaces with a pulsed heating system	26
---	----

ECONOMIC SURVEY	29, 30, 31

Industrial furnaces

On the occasion of the international symposium and exhibition ECONO-THERM'85 devoted to thermal treatment equipment due to take place on May 27 to 31 in Katowice, we are publishing two articles on the industrial furnaces made in Poland including furnaces for the metallurgical industry, process lines equipped with controlled atmosphere furnaces and vacuum furnaces. The subject of furnaces also discussed in an article opening a series of meetings with outstanding Polish constructors and scholars. The series will be aimed at a presentation of the newest achievements of Polish technology as well as of their authors. For details see p. 27

A system for industrial measurements of quartz crystal units

An original Polish measuring technique and a number of patented solutions are the basis of a semi-automatic system for industrial measurements of quartz crystal units. It has been possible to achieve a testing through-put of the system higher than 1 million quartz crystal units per year, and very good technical performance characteristics. The system is resistant to tough working conditions, reliable and highly accurate. For details see p. 18

Small export products manufacturing plants

The new Polish export offer covers several score small production plants manufacturing articles in high demand among customers, mainly articles for household use and for handicraftsmen's shops. The plants offered feature the following advantages: ready adaptability of their production programme to market requirements, small floor space requirements, low capital investment costs, high profitability, simplicity and reliability of the machinery and equipment, small manpower requirements, ease of training unskilled workers for the job. The article on p. 24 discusses one such plant, a small factory of cutlery offered in a „turn-key“ state.

Programmatic council: K. Badźmirowski, J. Czarnski, S. Gruzewski (President), S. Okoń, W. Przybylski, L. Sender, J. Toeplitz, T. Wasak
Editorial staff: J. Toeplitz (chief editor), I. Chmielewska, A. Witkowski (assistant editors), S. Hilscher (managing editor), E. Karska, J. Wolf
English editor: E. Karska
Graphic layout: F. Barącz
Production manager: A. Dziewulska-Kijas
